## Bring on the Crowds

**Tork PeakServe™ is setting a new standard for hand towel dispensing**

It comes as no surprise that the number one complaint of patrons of high traffic venues are overcrowded and unmaintained restrooms, and most people dread having to use restrooms in a public venue. In fact, 1 in 3 patrons of high traffic venues will limit how much food and beverage they consume just to avoid having to use the restroom.

So, how can building managers address patron concerns and upgrade their experience? The Tork PeakServe™ revolutionary dispensing system is designed to do just that! Neither a roll towel nor a folded towel system, Tork PeakServe™ is setting a new standard for hand towel dispensing that will be a crowd pleaser for both patrons and cleaning staff. Some key benefits of installing PeakServe™ are:

- Avoid run outs and increase customer satisfaction with 250% more hand towels<sup>1</sup>
- Optimize labour efficiencies and extend servicing with up to 600 more guests served between refills<sup>1</sup>
- Hand towels are compressed by 50%, allowing more refills to be carried on service carts and stored in supply closets

- Faster dispensing serves guests in 3 seconds – much quicker than jet air drying

Tork's innovative continuous dispensing technology allows each paper towel bundle to latch onto each other when loaded into the dispenser for a smooth and continuous flow. Towels are easily dispensed one towel at a time to reduce over-consumption, allowing patrons to get back to their day quicker than before.

Large facilities, like The University of Maryland, like the ability to top up the dispenser at any time, reducing the worry of run-outs. The dispensing technology also reduces the need to bend over to clean up waste due to no tabbing. The carry pack allows their cleaning teams to carry more refills with ease around their facilities<sup>2</sup>, so they don't have to keep going back to their supply room to re-stock.

Is the PeakServe™ right for your facility? This innovative dispensing system is ideal for high traffic venues such as airports, sports arenas, office buildings, post secondary institutions, convention centres and concert halls.

Ask your local sales representative today about this innovative new product. You can also learn more by visiting [www.bunzlcanada.ca/peakserve](http://www.bunzlcanada.ca/peakserve)

## Floor Care Essentials

### Diversey® Stride Citrus

A neutral cleaner concentrate formulated for everyday cleaning of floors and other hard surfaces. This product does not dull floor finishes, and does not require rinsing which delivers great labour savings.

**Item Code:**  
04100024

### REGARD® Floor Pads

REGARD®'s Black stripping pad combined with a water-based floor finish stripping solution will help to remove old sealers and floor finishes. Before re-coating, use the REGARD® Blue scrubbing pad and heavy-duty spray cleaning or foam scrubbing to remove dirt, spills and scuffs.

**Item Code:**  
\*Special Order

### Avmor® E88 CAPRICE

Neutralizes alkaline residues and effectively removes salt and calcium deposits on most floor surfaces and industrial carpeting. This remarkable detergent, not only neutralizes the residual effects of strippers and cleaners, but it also is a super efficient cleaner. Its deep penetrating action helps suspend the dirt and residues, lifting it to the surface for easy neutralization and removal.

**Item Code:**  
04200010ea

### Rubbermaid WaveBrake®

The next generation WaveBrake® helps to clean floors with less effort to get the job done safely, without sacrificing quality and durability. New features include improved safety and productivity, less splashing (up to 80%), convenient to empty, integrated handles and sink ledge, and a pour spout to help prevent water from spilling on floors.

**Item Code:**  
05000029

For more information on these and other products, please contact or visit your nearest Wesclean branch or visit [www.bunzlcanada.ca](http://www.bunzlcanada.ca)

## Dear Dusty,

As cold and flu season is in full swing I want to ensure that I am effectively cleaning my facility, in order to not only maintain a healthy environment, but also help to prevent outbreaks. Should I be using a sanitizer or disinfectant?

- Jerry

## Dear Jerry,

Properly sanitizing **and** disinfecting are key components in keeping your facility healthy and clean throughout the year, but especially during cold and flu season. Using a combination of both sanitizer and a disinfectant is the most effective method of cleaning.

What is the difference between the two? A sanitizer destroys 99.99% of any microbe present within 30 seconds. A disinfectant kills 100% of actively growing microbes, excluding endospores. The key difference between the two is that sanitizer reduces bacteria, while disinfectant kills it.

If you're looking to only use one type of product, we would recommend a disinfectant as they have excellent cleaning capabilities that surpass sanitizers when it comes to killing bacteria and germs.

You can take your facility cleaning to the next level by using an electrostatic disinfecting system such as Clorox® Total 360®. This system applies disinfectant with 360 degree coverage of surfaces, leaving your facility cleaner and healthier!

## Basic Care for Common Flooring Types

When it comes to flooring, one cleaning method does not fit all. Given the wide variety of floor types and materials, it's important to select the right method to leave your specific flooring material looking clean and fresh. (It will also protect your investment!)

This quick reference guide will help you choose the best cleaning method for some of the most common types of flooring. Whether you're looking to maintain your current flooring or upgrade the material, these tips will help you better understand your floors' specific needs.

### Vinyl

- Key Benefits: durable, resistant to acids, alkalis, oil and soil, easy to walk on
- Precautions: protect from scratching and maximize economy and aesthetic by using wax or floor finish

- Recommended Products: polymer-type water, solvent cleaning, polishing wax

### Linoleum

- Key Benefits: long-lasting, economical, easy installation, and durable
- Precautions: do not use lacquer or varnish sealing compounds
- Recommended Products: wax-type water emulsion finish, solvent cleaning, polymer-type water emulsion finish

### Laminate

- Key Benefits: economical, durable, scratch-resistant, easy to clean
- Precautions: warping in high-moisture areas, avoid waxing and refinishing
- Recommended Products: water and vinegar

Each floor type requires a comprehensive cleaning program to maintain its appearance and integrity. Ask our experts to create a customized floor maintenance program for your facility today!

## The Great Debate: Hand Towels vs. Air Dryers

It's no secret that proper hand washing is key to maintaining personal hygiene and preventing the spread of germs. Beyond proper hand washing, proper drying is just as equally important.

Think about the last time you washed your hands and had the choice between using an air dryer or paper towel. Which did you use? If you chose paper towel, you made the better choice. Here's why:

Compared to paper towels, air dryers can blow around bacteria which can actually **increase** the amount of micro-organisms on hands and surfaces.

Here are some facts that show why drying with paper towel is not only the safest method of drying, but also preferred:

- Jet air dryers can increase germ count on fingertips by up to 42%
- Upwards of 50% of air dryers are contaminated by coliforms
- Less time spent drying hands with paper towels – 22.5 seconds vs. 60 seconds with an air dryer
- Using paper towel to dry hands decreases germs on fingertips by upwards of 77%
- Convenience. (More than one person can dry their hands at a time without waiting)

Next time you have the choice between an air dryer and paper towel, choose cleaner, healthier hands!

### Kruger Titan® Bold

Introducing Titan® Bold. With ultra-modern, edgeless design and a gleaming black sheen, Titan® Bold innovates as it captivates. The Electronic Hybrid Roll Towel dispenser provides dual functionality with an ADA-compliant back-up mechanical lever and runs on extensive battery life. The Smooth-Cut Roll Towel dispenser ensures effortless, clean-cut dispensing every time. The first to North America Auto-Cut JBT dispenser dispenses individual 9" sheets to reduce excessive tissue waste and virtually eliminate toilet clogging.

## Product Showcase

### PURELL® ES8

Hand hygiene just got more innovative with the PURELL® ES8 Dispensing System. This dispenser takes on two of the most common service issues – worn out batteries and empty dispensers. With AT-A-GLANCE™ refill design, you can monitor product levels with just one look. And with a coin battery built in for each new refill, you get a new battery with every refill. The ES8 demonstrates to your patrons your commitment to cleanliness, all while reducing greenhouse gas emissions by 15% and a 68% reduction in battery waste compared to traditional systems.

### TASKI® swingo® 1655 XD

The new TASKI® swingo® 1655 XD is the next generation of heavy-duty walk behind auto scrubbers. Designed to tackle daily cleaning requirements in tough environments, this machine features advanced technology that improves productivity and performance. With simple, intuitive controls it allows for the machine operator to move with ease and reduce fatigue with ergonomic operations. The unique IntelliFlow™ system reduces tank refills and water consumption by 25%, maximizing cleaning efficiency.

## Why work with Bunzl Cleaning & Hygiene? We thought you'd never ask...

Choosing Bunzl Cleaning & Hygiene gives your business the power of global sourcing, the efficiency of a national network and the advantage of local relationships and expertise.

We know one size doesn't fit all. Let's talk about how we can create a unique solution that's just right for **your business**.
